

Supply Chain

Strengthen CSR foundations across the entire supply chain including factors of the environment, ethics, and human rights.

Social Issues

In recent times, depletion of agricultural, marine and mineral resources is now of great concern as consumption of resources expands rapidly to keep pace with expansion of the global population and economic growth. In addition, environmental destruction associated with new land development and labor exploitation issues, including harsh working environments and overwork, are becoming social issues. Against this backdrop, corporations are now required to build sustainable supply chains from the viewpoint of the environment, ethics, and human rights so that they can maintain a sustainable manufacturing process to provide products and services.

Fujifilm Group's Goals under SVP 2030

Strengthen CSR foundations across the entire supply chain.

The Fujifilm Group began as a manufacturer of photographic and motion picture film and has grown into a large corporation that encompasses 15 different businesses, including our healthcare business. Because of this change, the range of production related materials has increased and our supply chain now covers a wide range of fields. We understand the significance of corporate social responsibility and corporate ethics, and are implementing CSR activities to contribute to the sustainable development of society. However, it is impossible to achieve this through our own efforts alone, and it is important to tackle the issue across the entire supply chain. We ask our suppliers and partners related to the Group manufacturing processes to understand the importance of CSR management. With their understanding and cooperation, we will build a firm and strong CSR foundation by working together to resolve social issues.

CSR Activities Promoting throughout the Value Chain
